

CONTENTS

Selected papers of the International Scientific Conference 'Humus forms and biologically active compounds as indicators of pedodiversity', 27–28 August 2012, Tartu, Estonia

Foreword Raimo Kõlli	3
Humus cover and its fabric depending on pedo-ecological conditions and land use: an Estonian approach to classification of humus forms Raimo Kõlli and Indrek Tamm	6
Effectiveness of a shelterbelt in decreasing the level of inorganic elements in agricultural landscape Lech W. Szajdak and Irena Życzyńska-Bałoniak	24
Peat humic acid properties and factors influencing their variability in a temperate bog ecosystem Maris Klavins, Oskars Purmalis, and Valery Rodinov	35
Distribution of organic carbon in humic and granulodensimetric fractions of soil as influenced by tillage and crop rotation Inga Liaudanskiene, Alvyra Slepetiene, Aleksandras Velykis, and Antanas Satkus	53
Effect of spring oilseed rape crop density on plant root biomass and soil enzymes activity Rita Čepulienė, Aušra Marcinkevičienė, Rimantas Velička, Robertas Kosteckas, and Rita Pupalienė	70

All articles are provided with Estonian summaries.
