P. M.

Põllumajanduse peavalitsus

**Piimasaaduste väljaveo
kontrolljaam.**

11. märtsil 1925 a.

№ 442

Tallinn, Uue-Sadama tän. 2

Ringkiri.

**Kõigile registreeritud
piimatalitustele.**

Kontrolljaam juhhib piimatalituste tähelpanu järgmistele asjaoludele :

1) Aasta aruanded kontrolljaama poolt saadetud plankettidel tulevad tingimata õigeks ajaks, s. o. 15 aprilliks s. a. kontrolljaamale ära saata.

2. Kasutades käesolevat külma aega peaks piimatalitused kõik abinõud ja energia tarvitusele võtma jää tagavara muretsemiseks küllaldasel arvul, et suvel tegevus jää puudusel mitte takistatud ja halba kaupa valmistatud ei saaks.

3) Piima mustus on piimatalitustes üheks suuremaks paheks, mis takistab hea või valmistamist ka sel korral, kui piimatalituse sisseseade kõigiti nõuetele vastab ja kui võimeister ka küllalt vilunud on hea või valmistamiseks. On aga piimatalitus iseenesest puudulik ja veel nõrga teadmistega võimeister võid valmistab, siis on sarnasel teel saadud või saatus paratamata — siseturg.

On ette tulnud juhtumisi, kus piimataltitusest on peale lauda mustuse leitud uppunud putukaid, kärkseid ja isegi hiiresi. Muidugi on selles mustuses süüdi piimatoojad ning sarnasest piimast head võid valmistada ka kõige parema sisseseade ja võimeistri vilumuse juures on võimata.

Väga suureks teguriks hea või valmistamise juures on tingimata piima puhtus.

Sellepärast, eeltähendatud pahe osalisekski kõrvaldamiseks paneb kontrolljaam kõikidele piimataltituste omanikkudele ja juhatusale südame peale, et nad piimataltitustes mustuse proovide võtmise läbi viiksid ja proovide tagajärjed nähtavasse kohta ülesse paneksid. Sarnane demonstreerimine ehk mõjub piimatoojate peale, et nad puhtamat piima hakkaksid tooma. Neid piimatoojaid aga, kes sugugi piima puhtuse eest sihilikult ei hoolitse, võiks ka trahvida. Mustuse proovide võtmine ja trahvimise korraldus tuleks piimaühisustes peakoosolekute poolt vastu võtta. Sarnasel korral võivad ka juhatus ja võimeister kindlamalt tegutseda.

Näitena olgu tähendatud, et Soomes on juba nii kaugelge jõutud, et piima eest maksetakse mitte ainult piima hulga ja rasva % eest, vaid peale nende ka piima puhtuse eest.

Juhataja: J. Jaanhold.
