## ICS tegevusalade loetelu

Rahvusvaheline standardite klassifikatsioon (ICS) on ette nähtud rahvusvaheliste, regionaal- ja rahvusstandardite kataloogi ülesehituseks ja nende korrastussüsteemi aluseks. Samuti võib seda kasutada standardite ja normdokumentide klassifitseerimisel andmebaasides, raamatukogudes jne.

ICS aluseks on numbrite (tasandite) süsteem, milles esimesed numbrid näitavad üldist standardimisala ja järgnevad numbrid täpsustavad tegevusala alla kuuluva rühma.

Täieliku ülevaate saamiseks ICS klassifikatsioonist soovitame külastada meie kodulehekülge [www.evs.ee](http://www.evs.ee) või võtta ühendust EVS raamatukoguga.

## ICS subject structure

ICS (International Classification of Standards) has been developed to serve as a structure for building up catalogues over international, regional and national standards. The ICS system can also be used for classifying standards in data bases, libraries etc.

ICS is based on a numerical system in which the first digits stand for the general area and the following digits denote the more specific groups.

For a complete overview of the ICS system please look into our web site or contact our EVS Library.
